CHRISTOPHER HARVEY

(610) 613-8734 | cwaharvey@gmail.com | Website | GitHub | Linkedin

Full-stack web developer skilled in HTML/CSS, Express, MongoDB, Node, JavaScript, React, Redux, and Ruby on Rails with marketing experience demonstrating the ability to create diverse content for complex products and services in unique industries.

TECHNICAL PROJECTS

SaySomething | *Demo* | *GitHub*
Allows users to create posts, which can be up and down voted, and commented on.
- Utilized Passport's Google OAuth 2.0 to afford a proven, standardized authentication process with minimal setup
- Implemented a React JS front-end framework for its ability to create great looking UIs with a high-degree of code-reusability
- Added Redux to ensure predictable application state management and updates
- Created an API backend leveraging Mongoose, Express, and Node.

YouTuber | *Demo* | *GitHub*
React application accessing Google's API and returning a search query's results into a video player
- Installed Axios to leverage library's ability to easily make HTTP requests to APIs
- Efficiently managed application state internally with React thereby forgoing unnecessary complex code from a third-party library

GitGrabber | *Demo* | *GitHub*
JavaScript application that communicates with GitHub's API to return a queried user's profile and repositories
- Created exclusively with JavaScript to strengthen competence with language
